WORK EXPERIENCE

Ajaib – Jakarta, Indonesia Feb 2026 – Present
Frontend Engineer

Tech Stack: Tauri, TypeScript, React, Tanstack Query, Websocket, Tailwind, Agile Methodology.

- Developed and maintained Ajaib Terminal, a cross-platform desktop stock trading application for Windows and macOS, using Tauri, React, TypeScript.
- Built and enhanced trading workflows for market monitoring, technical analysis, and order execution, focusing on responsive and intuitive user interactions.
- Improved application performance and runtime stability during fast-moving market conditions by optimizing rendering behavior and desktop resource usage.

Bank BRI – Jakarta, Indonesia Oct 2024 – Jan 2026 (1 year 4 months)
Frontend Developer

Tech Stack: TypeScript, React, Next.js, Elasticsearch, Redis, Tailwind, Agile and Waterfall Methodology.

- Developed and maintained web-based/WebView embedded within the native AgenBRILink Ambilin cash pickup service application.
- Eliminated SonarQube reported bugs, reduced duplicated code to 0%, and increased unit test coverage to 100%, strengthening maintainability and release confidence.
- Resolved recurring Out of Memory (OOM) incidents in the WebView by identifying memory leaks and optimizing rendering and resource lifecycle management.

Hospital Harapan Kita – Jakarta, Indonesia Oct 2023 – Oct 2024 (1 year)
Frontend Developer

Tech Stack: Typescript, Angular, React, jQuery, Tailwind.

- Designed, built, and maintained internal SIMRS (Hospital Information System) web applications supporting clinical and administrative operations.
- Collaborated with medical staff and internal stakeholders to translate operational needs into usable, reliable interfaces.
- Improved User Experience, Proactively addressed improvements, bug fixes, and performance enhancements, reducing transaction failures by 90%.

Pintarnya – Jakarta, Indonesia Oct 2022 – Aug 2023 (11 months)
Frontend Engineer

Tech Stack: Typescript, React, Next.js, Tailwind, MoEngage, Agile Methodology.

- Built and launched a fully mobile-responsive employer dashboard, optimized for high mobile usage, contributing to a 70% increase in mobile engagement.
- Built a Talent Pool system, enabling employers to manage candidate statuses and hiring workflows more effectively.
- Built and implemented custom components, reducing code duplication and enabling reusable components with multiple variants for better maintainability.

Alodokter – Jakarta, Indonesia Jun 2019 – Oct 2022 (3 years 5 months)
Frontend Developer

Tech Stack: JavaScript, Polymer.js, jQuery, A/B Testing, Google Analytic, Agile Methodology.

- Revamped Alodokter doctor discovery and booking flow, improving the end-to-end user experience and increasing user engagement.
- Designed and executed A/B tests, analytics tracking, and experiment measurement to validate UI/UX hypotheses and guide data-informed product improvements.
- Maintained frontend stability and performance across high-traffic booking flows.

Frontend Developer

Tech Stack: *JavaScript, jQuery, Vue, Wordpress, Bootstrap, SASS, Agile Methodology.*

- Developed and maintained responsive frontend features for Indonetwork main B2B marketplace website, supporting the presentation of supplier and product information across desktop and mobile devices.
- Built and customized client websites, including company profiles and product catalogs, translating customer requirements into responsive and professionally branded web experiences.

Web Designer & Frontend Developer

Tech Stack: *JavaScript, jQuery, HTML, CSS, Bootstrap, Photoshop, Agile Methodology.*

- Designed and developed responsive user interfaces for Indotrading B2B marketplace platform, translating visual concepts and business requirements into production-ready web pages.
- Maintained and enhanced existing frontend pages by resolving layout, usability, and cross-browser compatibility issues to ensure a consistent experience across the platform.
